DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Hollow Road Bridge is a single span low pratt steel truss bridge which spans Little Catoctin Creek near Harmony. The single lane bridge is set on coursed random stone and is approximately twenty-five feet in length and twelve feet wide. Joints of the bridge are secured with pin connections. South side tension lines of the structure have been severely damaged by automobile accidents. Numerous parts have been replaced. No plaque on the structure indicates the building date or manufacturer.

SPECIFIC DATES

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

At one time there were over twenty companies manufacturing iron truss bridges represented in the Maryland and Virginia area. Usually once a community had determined the need for a bridge, the County Commissioners advertised for bids in the local newspaper. A particular bridge design or style was chosen from a book of designs by the manufacturing company and a bid was submitted.

Companies which provided bridges to Frederick County, Maryland in the nineteenth century include the Wrought Iron Bridge Company of Canton, Ohio, the King Iron Bridge and Manufacturing Company of Cleveland, Ohio, and the Groton Bridge Manufacturing Company of Groton, New York. Most of the bridges constructed in the twentieth century in this county were manufactured by the York Bridge Company of York, Pennsylvania.
